

**If you would like to carry on using your Pool or Spa for a longer season a Telescopic enclosure may be the answer.**

Enclosures allow you to have an Extended swimming season (from Spring to Autumn). Use your patio or swimming pool even in bad weather (simply slide the segment to enclose it). Slide your enclosure off the pool or patio in hot days (let the pool or terrace breathe). Store your garden furniture in the enclosure in winter (you don't need to move them for the winter). Keep thermal comfort even on colder days (special design keeps the warm air within the enclosure).

Cut down on chemical usage and time spent cleaning the pool as debris is kept out.

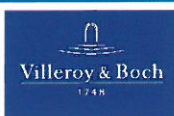

Minimise heat loss through the night (pool and patio enclosure has this special feature).

Slide segments with ease (unique functionality of the step-on sliding rails).

Keep safe with additional safety features - enclosures are fully lockable (don't worry about your pets and kids anymore)
